A scene from The Pelayos, with the actors Lluís Homar and Daniel Brühl seated at the table. Gonzalo García-Pelayo's winning racehorse 0 is named Going Wrong, and bets are 12 to 1 just before the race at the tracks in Cheltenham, UK. 0 The 450 euros that he has put down on the jockey in the green-striped shirt is part of a "private 0 investment fund" which relies on tipsters and earns him a 30-percent annual return. Just then, his cellphone vibrates: it's a 0 text from another tipster. In the match between Fernando Verdasco and Juan Martín del Potro, he should bet against the 0 Argentinean tennis player winning more than four games against the Spaniard. García-Pelayo then explains that he is in the process 0 of creating a new formula for tennis bets based on the theory that if the pre-match favorite favorite loses the 0 first set, he or she will win the second. If his studies prove conclusive, he will program it on his 0 computer, under "Favorite loses first set" so it automatically launches.

The race starts at Cheltenham. García-Pelayo leans back on his office 0 chair, watching the screen with the remote in his hand. It's mid-afternoon on a Tuesday in March, and the gambler 0 is dressed in cords and checkered shirt. His white beard and hair are disheveled, his reading glasses hang from his 0 neck. His desk is covered in several layers of dust and papers scribbled with formulas and numbers - their degree 0 of yellowing is a like a scale that reflects the strata of his life as a gambler.

This is more or 0 less the position in which he spends his days at home in Madrid, although he does inch closer to the 0 screen in order to determine the exact placement of his horse (Going Wrong seems to be in third place, maybe 0 second; it's hard to tell on the small screen).

At times he gets up to check the other four computers he 0 has placed in various rooms in his house. They are all buzzing with their own activity, offering players from all 0 over the planet bets that he has programmed. An electronic cry of "Goal!" can be heard every so often from 0 one of them, announcing a new development in the ongoing Debrecen-Kaposvár game in the Hungarian League. The software immediately updates 0 itself, offering 2.6/1 that it will be four-goal match. Soccer is the axis upon which García-Pelayo's private fund rotates. His 0 computers offer 200 bets daily, from which he expects to earn some 15,000 euros a month, part of which will 0 go to the investors and the remainder to a retirement fund. It took him a year to study how and 0 what to program: "a degree in sports betting," he calls it. Though he will be 65 in June, there are 0 a lot of unexplained gaps on his résumé.

Gonzalo García-Pelayo posing with his wife and children on working vacations in Las 0 Vegas. Gonzalo is the patriarch of the Pelayo clan, a family who shot to fame in the 1990s for designing a

0 statistical-based method for winning on the roulette wheel. According to the family's estimates, they won some 250 million pesetas (1.5 0 million euros) between 1991 and 1995, mainly in the Madrid Gran Casino - their "greatest enemy" but also the "laboratory" 0 in which they tested their system. So Gonzalo and his son Iván wrote in *La fabulosa historia de los Pelayo* 0 (or, *The fabulous history of the Pelayos*), published by Plaza y Janés.

Their discovery was accidental. Gonzalo had sent his nephew 0 to the casino to learn the ways of the croupiers. He wanted to study their "ways of dropping" in the 0 hopes of determining a pattern in the path, bounces and final resting place of the ball. His nephew took down 0 numbers and dealers' names; Gonzalo analyzed the data on a program on his computer. That was when he discovered that 0 some numbers come up a lot more often than others, a tendency that had nothing to do with the dealer 0 and everything to do with defects in the manufacture and leveling of the tables. His hypothesis: "If Swiss watches and 0 NASA rockets have imperfections, then so do roulette wheels."

His computers offer 200 bets daily; he expects to earn €15,000 a 0 month

These were the times of the get-rich-quick schemes, of the Seville Expo and the Barcelona Olympics. The patriarch decided to 0 try his luck at roulette following a series of business failures, he recalled recently in an interview along with his 0 children, Iván and Vanessa. He has tried his hand at most everything: from radio announcer to matador manager. In the 0 1970s, he had a go at the movie industry. His second movie, *Vivir en Sevilla* (or *Living in Seville*, 1979) 0 received the following review from critic Fernando Trueba: "Clumsy dialogue and too calculatedly avant-garde." Next, García-Pelayo opened a nightclub in Seville, 0 where as DJ, he played Pink Floyd and Frank Zappa. He went underground after a judicial order closed the establishment 0 down on rumors that minors were using drugs in its backrooms. He moved onto the recording industry, discovering artists such 0 as Triana and María Jiménez. In total, he left his signature on some 130 albums, including some by Luis Eduardo 0 Aute, Gato Pérez and Joaquín Sabina. The latter singer dedicated a few lines to García-Pelayo in his well-known song, *19 0 días y 500 noches* (or, *19 days and 500 nights*), including: "Yesterday, the doorman threw me out of the Torrelodones 0 casino."

García-Pelayo branched out into producing TV programs, and had a few hits, but he shut down his company after he 0 was accused of fleeing to Brazil, he says, and by that point, they were no longer taking his calls in 0 the music world. So he started looking for a new gig, "beyond the limits of luck," as he calls it.

After 0 his first few hypotheses on roulette tendencies, García-Pelayo formed a team led by his son, Iván, a recent philosophy graduate 0 and musician (he composed *Africanos en Madrid* (or, *Africans in Madrid*)). There wasn't anybody over 26 years old in the 0 first group. Though the figures and dates are now blurred, as often occurs in legends, after a "few months" recording 0 numbers and working with the data, betting began in earnest in the fall of 1991. According to the book, they 0 won close to "a million pesetas a day" in the first month. They played every day, from 5pm to closing. 0 "A blue-collar job, not at all glamorous, with 12-hour days," says Iván. "And on your feet the whole time," adds 0 his sister, Vanessa.

They are interrupted by the sound of their father's cellphone ringing - the Beatles' Eleanor Rigby is the 0 ring tone, and he comments that he would like to see a movie which portrays his clan like the Liverpool 0 quartet, with "producer Phil Spector hovering in the background." That role is actually played by actor Lluís Homar, the spitting 0 image of García-Pelayo. And the preceding scenes, or a version of them, kick off the *The Pelayos* by director Eduard 0 Cortés (the movie premieres on April 27). "We are the Pelayos, and we have the opportunity to do something extraordinary: 0 break the bank in a casino," says actor Daniel Brühl (*Good Bye, Lenin!*) in the role of Iván.

"This is a 0 classic story: the dream of a handful of social pariahs whose rival is big business," enthuses the director, who fell 0 under the family's magnetic spell after living with them for a period.

If Swiss watches and NASA rockets have flaws, then 0 so do roulette wheels"

Though the film mixes fact and fiction, the script accurately reflects the clan's hostility toward the managers 0 of the Torrelodones casino. "Every great feat has a great enemy," say the Pelayos

today (and in the book: "We 0 relish our detestation for the casino managers in the way that a boxer finds strength in his hate for his 0 opponent"). The family was involved in long-drawn-out court case against these executives that started when they were kicked out of 0 the establishment in 1992 for committing what the casino termed "gaming irregularities." The battle ended with a Supreme Court sentence 0 in 1994 that recognized the legitimacy of the Pelayos' methods and even praised their "inventiveness."

The bad guy in the movie 0 is a malicious casino manager called La Bestia (The Beast), played by Eduard Fernández. The movie doesn't say which casino 0 he works for, but all of this attention has understandably caused concern (and anticipation) among management at the Madrid casino, 0 who were not consulted by the movie's scriptwriters.

"We don't have anything against anybody," says the casino's communications director, his voice 0 mingling with the sounds of chips falling in the European Room at Torrelodones. "The Pelayos really are not part of 0 our everyday conversations around here. They represent just another story among the more than 18 million visitors we get here. 0 We looked into whether they had some sort of advantage over the other players, and we fixed the imperfections in 0 the tables."

He tiptoes around the subject of the expulsions. He doesn't know what the family's total winnings amounted to. He 0 says they never - "no way" - broke the bank. Jesús Marín, pit boss in the time of Pelayos, and 0 current games director, adds, "They never played a lot of numbers, and they always played the same ones. They usually 0 won, but their story has been exaggerated. It was immediately discovered that the roulette tables had a pattern; so first 0 the wheels were switched from one table to another, then the entire tables were replaced. They played three or four 0 weeks in total."

We have the chance to do something extraordinary: break the bank in a casino"

One former croupier, who prefers 0 to remain anonymous, remembers that the Pelayos' winning streak happen to coincide with a labor dispute between management and staff 0 over an annual 2.6 billion pesetas in tips, complete with full and partial strikes throughout the year. "There was a 0 lot of confusion and some things went unnoticed. That probably was a factor. One of the tables, table 13 or 0 14, was in bad shape. The wheel hadn't been properly leveled, and they discovered this by watching and taking notes. 0 That is where they had their big wins, about 100 million pesetas. But their method never worked as well in 0 other casinos."

The book mentions other wins in Vienna (14 million pesetas in one night), Amsterdam (almost 13 million) and 40 0 million in Lloret de Mar, where the movie was filmed. But apart from one old Casio calculator, little physical evidence 0 of this past remains today in the penumbra of Gonzalo's bedroom. After being repeatedly thrown out of the Torrelodones casino, 0 he continued to visit the its roulette tables through his string of "underground" players, which included Luis Mazarrasa, a journalist 0 who later published his story in EL PAÍS. There is something about the Pelayo clan that causes one to suffer 0 a slight case of the Stockholm Syndrome. They welcome every visitor as if he or she may be the beginning 0 of something new; there is a half-carved ham leg in the kitchen, and something about the smell of the house 0 and the bookshelves full of movies and albums activates that part of your brain where memories of childhood are stored.

Beyond 0 this, there is the money. Mazarrasa recalls winning 1.8 million pesetas (just over 10,000 euros) in three days. García-Pelayo's team 0 broke up in 1995, when he set up an illegal poker establishment. That's another story - maybe another movie. At 0 the end of his roulette adventures, García-Pelayo had a stash of over 60 million pesetas. But money doesn't last long 0 in the hands of a gambler and travel lover. "For Easter holidays, I will only have whatever I get out 0 of these bets. I live day to day," he says. It is still Tuesday when his winning horse, Going Wrong, 0 finishes ninth, Verdasco loses more than four games to Del Potro, and the cry of "Goal!" continues to be heard 0 from the other computers.
