Tecnicamente, esses esportes perigosos e extremos podem não ser os mais letais, mas certamente farão com que você sinta que a morte está chegando – e é isso que realmente conta.

Os esportes mais perigosos e extremos: Mergulho livre

A associação mundial do mergulho livre, AIDA, afirma que: "Quem prendeu a respiração debaixo d'água mergulhou livremente".

Mas aqueles que já tocaram o fundo da piscina não têm nada a ver com os mergulhadores livres aparentemente destemidos que mergulham até 214 metros abaixo da superfície do oceano com uma única respiração.

Tanya Streeter, detentora de recordes sem limites, diz que durante uma descida, "o cérebro sinaliza para interromper o suprimento de sangue oxigenado para órgãos que não precisam dele" e no fundo de um mergulho livre, a frequência cardíaca de um mergulhador cai para apenas 12 a 15 batimentos por minuto.

Full Ring Game Poker

In poker, a ring game, is a cash game where there are more than six players seated on a table. Typically, 9 to 10 players are seated in a full ring poker game and when players get eliminated one by one to reduce to six or less in numbers, it is called a shorthanded table.

Full ring poker games witness a diverse range of playing styles due to the larger number of players on a table. As such, players tend to play more conservatively due to the increased possibility of stronger hands amongst opponents.

Due to the greater number of players involved, full ring cash games also run at a slower pace than shorthanded games. A greater number of players means more time taken to act in a hand, thus leading to a more careful and deliberate game.

Origin of

Full Ring Game Poker

The key term, "Full Ring" doesn't carry any historical significance, but it became popular as poker players began to distinguish poker games with greater and lesser number of players present on a table. Those with fewer players were commonly referred to as shorthanded or 6-Max games. Then there are heads-up games as well that consist of no more than two players going against each another.

In

traditional live casino setups, poker tables were typically designed and crafted to accommodate nine to ten players, thereby giving rise to the term "Full Ring".

Key

Features of Full Ring Poker Games

Full Ring Poker games carry a bunch of features that

set them apart from shorthanded 6 Max games which in turn influences a player's style and game strategy. Let's figure them out to understand them better.

### Number of Players

This is a key feature that you are well aware of by now. Full Ring poker games often feature no less than 8 players on a table, whether you play live in a casino or in an online poker app such as ours. This is in strong contrast to 6 Max games that feature no more than 6 players on a single table.

### Number of Positions

Due to the increased number of players, the number of positions also increase. These positions are tagged as follows:

**Small Blind (SB):** The player to the dealer's immediate posts the smaller of the two forced bets, called the small blind, before the start of each hand.

The player to the dealer's immediate posts the smaller of the two forced bets, called the small blind, before the start of each hand. **Big Blind (BB):** The player to the left of the small blind, posts the larger of the two forced bets, called the Big Blind. The big blind also acts last in the first betting round.

The player to the left of the small blind, posts the larger of the two forced bets, called the Big Blind. The big blind also acts last in the first betting round. **Under the Gun (UTG):** The player seated immediately to the left of the big blind is called Under the Gun (UTG). This is one of the earliest positions that always act first after the blinds in the betting rounds.

This is a favourable position as here you have more information about your opponents who acted earlier than you.

The player seated to the right of the dealer button is the Cut-off. This is a favourable position as here you have more information about your opponents who acted earlier than you. **Button:** The player in the dealer position is always marked by the dealer button. The button is the most advantageous position of all as you have maximum information and get to act last in all post-flop betting rounds.

### Table Dynamics

A greater number of players often make it challenging to predict your opponent's moves as there are different personalities in play at once, not to mention the increased number of positions on the table. This affects your positional play significantly and brings in more complexities compared to 6-max games.

This

diversity can make it challenging to predict your opponents' moves, as there are more potential strategies in play. The table dynamics in a full ring cash game can therefore be more complex compared to a short-handed game. You must observe your opponents acutely to make highly informed decisions.

#### Skill Level

In 6 max or shorthand poker

games, you will face a greater number of difficult scenarios due to the increased pressure of blinds and being in early positions often. This pushes you to do better in order to survive and succeed.

Conversely, the learning curve for honing your poker

skills in full ring poker games is gradual. In this format, you gain more time to acclimate yourself to the game without the imminent pressure of the blinds and aggression from your opponents. This is often why experienced players often prefer shorthanded games to full ring settings.

#### Positional Strategy

Positional strategy is

critically important in full ring poker games. It has a visible impact on the decisions you make throughout a hand. For instance, you have informational advantage over your opponents and more bluffing opportunities. You can value bet and extract maximum value from your strong hands.

Being in late position also helps you avoid difficult decisions

by observing how early opponents reacted before deciding your own course of action.

Positional strategy also includes stealing blinds from late positions by raising from the cutoff or button and winning blinds without much fight.

Perhaps, the best

positional strategy in full ring poker games is the flexibility you enjoy adapting to the changing dynamics of the table. You can tighten or loosen up your game depending on the nature of play in action.

#### Full Ring Games vs Shorthanded Poker Games

The choice

between shorthanded or full ring poker games depends on your personal preferences.

Factors such as playing pace, style and the level of action you desire determine which games you should go for.

Some players enjoy fast-paced shorthanded games associated

with increased pressure and aggression. Others may prefer more gradual paced full ring cash games due to their larger player field and no heightened pressure of the numerous blinds.
